Carolina Biokits Urinalysis And Examination

Examination of the urine is an essential procedure for diagnosing human disease. With this kit, students test normal and abnormal simulated urine specimens and determine probable disorders. Included are tests for color, pH, specific gravity, glucose, and protein. FREE 1-year access to digital resources that support NGSS instruction included.

Carolina BioKits®: Urine Examination | Carolina.com

Urinalysis is a test that analyzes the composition of urine. A urine sample can be collected in a sterile container or a nonsterile container, depending upon the tests being completed. Often, test strips are used to determine whether typical components are present within a normal range.
