Ingersoll Rand Air Dryer Ds

D-EC Cycling Refrigerated Dryers 0.25-3.5 m³/min, 10-125 cfm. Ingersoll Rand helps you to achieve maximum energy savings, while ensuring a continuous supply of dry, high-quality compressed air when you use its D-EC cycling refrigerated dryer. It is designed to help users achieve optimal performance at a lower cost of ownership compared to non-cycling dryers.

D-EC Cycling Refrigerated Dryers 0.25-3.5 m³/min, 10-125 cfm

a lower capital investment, Ingersoll Rand has a desiccant dryer that fits your needs. Heatless Desiccant Dryers Drying: (1) From the air compressor, the air enters the dryer through a pre-filter that removes contaminants to protect the desiccant. (2) The air is directed through the drying tower. (3) The desiccant removes moisture from the air ...

Ingersoll Rand

HL heatless desiccant dryers use twin desiccant towers with strategically positioned valves to dry compressed air. The simple technology of heatless dryers divert a portion of dried compressed air to an off-line tower. The dry air then flows through and regenerates desiccant. Although operating costs run higher than the heated desiccant dryers, the HL series requires the lowest capital investment.

Heatless Desiccant Dryers 2.5-142 m³/min, 800-5,000 cfm

Air Dryers. Air quality can have a significant impact on compressed air systems. Properly treated compressed air will improve productivity, system efficiency and product or process quality. Choosing the appropriate dryers and filters is very important.
